collar collection drive for

CLAW

Community Led Animal Welfare

**"I know this photo will shock you! YOU can help to STOP this happening again!
This dog was brought to us for help. First we smelled the rotting flesh
and then we saw the agony, and felt the fear..."**

**This dog was not injured maliciously... this is the result of a chain that became too small
as the dog grew, and became embedded in the dog's neck.**

This is the result of ignorance, a lack of knowledge, and it is sadly all too common!

**We took the dog to CLAW - Community Led Animal Welfare, he was given
immediate treatment. This dog is one of the lucky ones! He will recover!**

But there are far too many others out there, with embedded chains and collars.

Their suffering is unnecessary and preventable!

**How can YOU help?? Paws for People® want you to either donate collar(s),
leads or money (so that we can buy proper dog collars) for CLAW to give out.**

Paws for People® therapy dogs want to STOP this happening to their Canine Friends."

Deposit your donation into Paws for People®
